

Tech Day 4 Kids

Saturday March 5th 10AM – 4PM & Sunday March 6th 11AM – 3PM

Impact Hub Santa Barbara 1117 State St.

Brought to you by

An interactive experience for the community. Attendees of all ages will understand how art, creativity, health and environmental consciousness are as essential as coding, math and science in all aspects of technology.

SanWood, LLC and aki Movement Labs will demonstrate how sensor technology will eventually interact with wearable devices to help monitor health, fitness and training.

Arrow Electronics' engineers will discuss how they conceptualized and customized a race car driven by a paralyzed, former Indy Racing League driver <http://community.arrow.com/sam/> and Arrow's 2016 Super Bowl commercial featuring Legos and paper airplanes <https://youtu.be/jU7dFrXvPKA>

Laritech, Inc. will discuss first steps in developing hardware from concept to reality.

Citrix will showcase a Virtual Reality demo

Hoy En Tec will provide bi-lingual (English/Spanish) social media feeds during the event, as well as insights into purchasing great laptops/tablets for children under \$200.

“Make the World a Better Place,” A project inspired by Rhaya Sanchez and Ava Demmon, 2nd graders at Roosevelt Elementary School. A child's perspective of why we should care for our environment, and the little things we can do to protect our planet. Art photography shared by Alana Sanchez, 5th grader at Roosevelt Elementary School.

Fun & Prizes for every attendee regardless of age.
